PRODUCT DATA SHEET

Batter IT

Our Batter IT product was designed to be sprayed onto battered cuttings on highways and new roads to hold the exposed soil from erosion and slump long enough for vegetation to stabilise the soil long term.

Batter IT will hold soil up to 30 degrees and withstand normal rain events. Seed can be mixed with this product on site and sprayed onto the soil surface. It also allows water to enter the soil and hold the moisture long enough for seed germination and proliferation.

Batter IT is a water based organic product without any negative environmental impacts.

For further information on Road Base Mixing Agent, visit our [Resources](#) page.

ADVANTAGES:

Holds soil on battered slopes long enough for vegetation to take hold, Seed can be mixed with Batter IT on site, allows soil to remain moist for maximum seed germination. Easy to apply via a number of methods. Batter IT is bio-degradable presenting no harm to the environment.

TYPICAL PROPERTIES:

Appearance, Batter IT is liquid at ambient temperature and is green in colour, with a specific gravity of 1,

SOLUBILITY:

Batter IT is dispersible in water.

APPLICATIONS:

- Mining Rehabilitation
- Road/Highway Construction
- Culvert Construction
- Stockpiling Soil/ore

TYPICAL USAGE LEVELS:

Diluted with water, up to 100:1 depending on the application.

INCORPORATION:

Batter IT can be added directly to the water tank on a spray truck, to fixed water storage tank systems or hand watering systems

SHELF LIFE:

12 months from the date of manufacture, when stored at ambient conditions in the original container.

PACKAGING & STORAGE:

Product should be stored in a cool, dry environment away from sunlight and excessive heat. Consult the Safety Data Sheet prior to use.

REGULATORY:

Please [contact us](#) to request the Safety Data Sheet for additional information
