PRODUCT DATA SHEET

Wet IT Down

Wet IT Down is a superior wetting product reducing the amount of water required for specific applications due to its powerful formulation.

On average it saves about 30-40% water utilisation. It breaks down surface tension even with the most difficult natural and artificial soils and allows water to penetrate deeper for Road Construction, Dust Suppression or Agriculture Projects. Wet IT Down therefore reduces the cost of water and the number of runs by a water truck when water is scarce or expensive to acquire.

There are no environmental impacts when using Wet IT Down.

For natural soils higher water penetration, results in less evaporation, less water runoff, extended water coverage and extended re-application times allowing better equipment utilisation and reduced costs

For agriculture deep water penetration gets water deeper into the root zone for better growth.

For further information on Wet IT Down, visit our [Resources](#) page.

ADVANTAGES:

Penetrates deeper into soil or stockpile. Holds moisture longer but allows drainage to prevent sodden conditions. Suppresses dust on roads and similar surfaces by holding moisture on dust particles longer to prevent particles from becoming air borne. Wet IT Down is bio-degradable presenting no harm to the environment

TYPICAL PROPERTIES:

Appearance, Wet IT Down is liquid at ambient temperature and is light blue in colour, with a specific gravity of 1,

SOLUBILITY:

Wet IT Down is soluble in water.

APPLICATIONS:

- Land Rehabilitation
- Agriculture
- Stockpiles
- Mulch Manufacturing
- Tree establishment

TYPICAL USAGE LEVELS:

Diluted with water, up to 2000:1 to 5000:1, depending on the application.

INCORPORATION:

Wet IT Down can be added directly to the water tank on a spray truck, to fixed water storage tank systems or hand watering systems.

SHELF LIFE:

2 Years from the date of manufacture, when stored at ambient conditions in the original container.

PACKAGING & STORAGE:

Product should be stored in a cool, dry environment away from sunlight and excessive heat. Consult the Safety Data Sheet prior to use.

REGULATORY:

Please [contact us](#) to request the Safety Data Sheet for additional information
